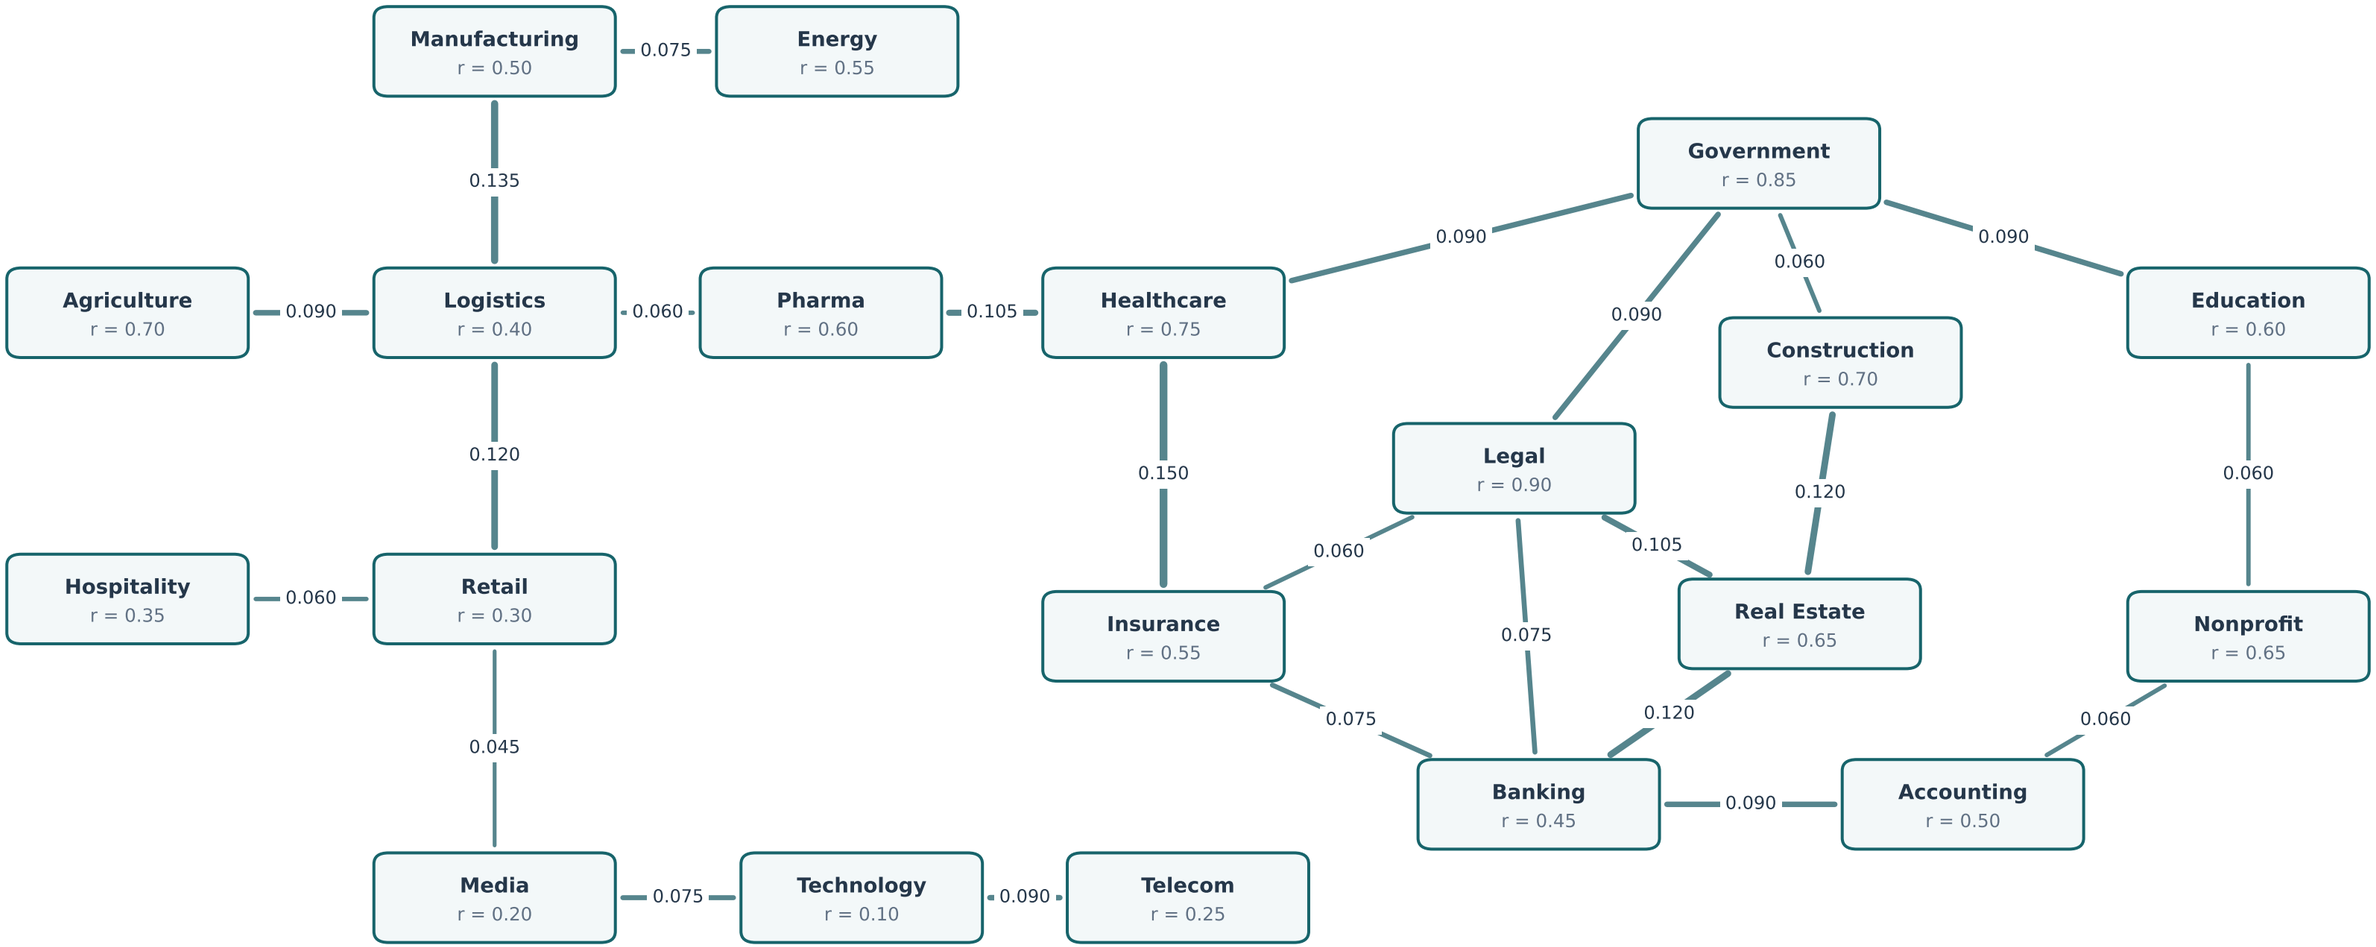
ONE REGION / 20 INDUSTRIES / 24 CONNECTIONS

The Ising industry network

One spin per industry: paper (s = -1) or digital (s = +1). Connected partners favor matching states.



NODE LABEL: resistance r | EDGE LABEL: coupling J_ij | Thicker line = stronger tie

$$E(\mathbf{s}, y) = -\sum_{(i,j)\in\mathcal{E}} J_{ij} s_i s_j - \sum_i [A(y) - r_i] s_i$$

Challenge-suggested baseline values. Schematic layout; positions are not geographic. Each undirected tie is shown once; J_ii = 0.
